

Ensure students have joined all classes and are able to join the appropriate Google Meet each school day!

After logging into their Student Portal, students should check their email (for the classroom code) or their Google Classroom icon (where the class will appear). The method depends on how the teachers sent the invite to join. Student aides may or may not be part of the Google Classroom. If not part of the Google invite, teachers contacted those students individually to provide them with directions.

Once in the Google Classroom, your child will see a Google Meet (Meet invite) that is unique to the class in the banner at the top. They click on that link to access the teacher and the live instruction. Students can log-in early and wait for the teacher to allow them to join the Google Meet (Meet Link).

ALL Google Classrooms and Google Meets should be accessed through the Student Portal!
